

1.	Name of Item	<p><b>GRSP SLEEPERS BONDER EC-2000</b> for pasting Grooved Rubber Pads to Concrete Sleepers and Rail Track. Consistency – Brush able Liquid</p> <p>Density – 0.9gm/cm<sup>3</sup></p> <p>Solid Content – 28% ± 6%</p>
2.	Usage	<p>To prevent PRC Sleepers from getting damaged from the direct hitting of Rail over its surface due to displacing of Grooved Rubber Pad. It bonds Rubber pad with Concrete sleeper and does not allow it to move from its respective position especially at CMS Crossings and turnouts where GMT is high.</p>
3.	Benefits	<ul style="list-style-type: none"> <li>a. Easy to apply</li> <li>b. No repositioning of rubber pads is required.</li> <li>c. Enhancing Safety concerns</li> </ul>
4.	Consumption	<p>One k.g pack can cover about 14sq.mtr area, as per manufacturer's recommendations</p>
