

LAKSHMI BRAND MONO RAIL CUM ROAD TROLLEY (LMCRT-1)

Specification no: TM/SM/16 dt: 31.03.1992

INTRODUCTION:

Mono Rail-Cum-Road Trolley is an efficient means of transportation of light weight material & small track machines weighing up to 100 kg from PWI stores to working site. Sometimes there are requirements of gang man tools or any other light weight machines at the site then, this trolley provides an excellent path by rail as well as by road. If there is a train passing by, then gang man can switch to Nylon tyres and trolley can be used on road very easily. It has a removable handle that can be fitted on either side of trolley which nullifies the requirement of a turn while pulling.

SALIENT FEATURES:

1. Light in weight (17kg. max).
2. Dual mode of operation (Rail as well as road).
3. Removable handle with option to fit on either side.
4. Requires less force for operation.
5. Less maintenance required.

SAFETY PRECAUTIONS:

1. Do not load more than 100 kg weight over the trolley.
2. While changing the rail to road mode or vice versa please off load the trolley.

MAINTENANCE:

1. Regular greasing of ball bearing and oiling of bushes is necessary.
2. Check the wear and tear of Nylon tyres and if required change them.
